

gen FORW>RD

GenForward February 2017 Toplines

The first of its kind bi-monthly survey of racially and ethnically diverse young adults

GenForward is a survey of the Black Youth Project at the University of Chicago with The Associated Press-NORC Center for Public Affairs Research

Interviews: 2/16-3/6/2017

1,833 adults 18-30

Margin of error: +/- 4.0 percentage points at the 95% confidence level among adults 18-30

NOTE: All results show percentages among all respondents, unless otherwise labeled.

Q1. Overall, do you approve, disapprove, or neither approve nor disapprove of the way Donald Trump is handling his job as president?

	African American adults 18-30	Asian American adults 18-30	Latino/a adults 18-30	White adults 18-30	All adults 18-30
Strongly approve	4	6	5	15	11
Somewhat approve	6	9	7	14	11
Neither approve nor disapprove	17	14	16	16	16
Somewhat disapprove	12	20	19	15	16
Strongly disapprove	59	49	53	40	46
DON'T KNOW	1	-	-	*	*
SKIP/REFUSED	1	2	*	*	*
<i>N=</i>	516	277	504	505	1,833

Q2. Overall, do you approve, disapprove, or neither approve nor disapprove of the way Congress is handling its job?

	African American adults 18-30	Asian American adults 18-30	Latino/a adults 18-30	White adults 18-30	All adults 18-30
Strongly approve	1	4	2	3	3
Somewhat approve	12	7	11	13	12
Neither approve nor disapprove	32	29	31	31	31
Somewhat disapprove	19	26	28	28	27
Strongly disapprove	35	33	27	24	27
DON'T KNOW	*	-	*	*	*
SKIP/REFUSED	1	1	*	-	*
N=	516	277	504	505	1,833

Q3. For both parties, please select if you have a favorable or unfavorable impression of that party. If you don't know enough about the party to have an opinion, you can say that too.

[ITEMS RANDOMIZED]

The Republican Party

	African American adults 18-30	Asian American adults 18-30	Latino/a adults 18-30	White adults 18-30	All adults 18-30

Study Methodology

The GenForward February survey is a project of the Black Youth Project at the University of Chicago, with The Associated Press-NORC Center for Public Affairs Research. Interviews were conducted with a representative sample from GenForwardSM, a nationally representative survey panel of adults ages 18-30 recruited and administered by NORC at the University of Chicago and funded by grants to the Black Youth Project at the University of Chicago from the John D. and Catherine T. MacArthur Foundation and the Ford Foundation.

A total of 1,833 interviews were conducted between February 16 and March 6, 2017 with adults ages 18-30 representing the 50 states and the District of Columbia, including completed interviews with 516 African American young adults, 277 Asian American young adults, 504 Latino/a young adults, 505 white young adults, and 31 young adults with other racial and ethnic backgrounds. The survey was offered in English and Spanish and via telephone and web modes.

The GenForward survey was built from two sample sources:

- Fifty-one percent of the completed interviews are sourced from NORC's AmeriSpeak® Panel. AmeriSpeak is a probability based panel that also uses address-based sample but sourced from the NORC National Frame with enhanced sample coverage. During the initial recruitment phase of the AmeriSpeak panel, randomly selected U.S. households were sampled with a known, non-zero probability of selection and then contacted by U.S. mail, email, telephone, and field interviewers (face-to-face).
- Forty-nine percent of the completed interviews are sourced from the Black Youth Project (BYP) panel of young adults recruited by NORC. The BYP sample is from a probability-based household panel that uses an address-based sample from a registered voter database of the entire U.S. Households were selected using stratified random sampling to support over-sampling of households with African Americans, Latino/as, and Asian Americans ages 18-30. NORC contacted sampled households by U.S. mail and by telephone, inviting them to register and participate in public opinion surveys twice a month.

Panelists on both the BYP and AmeriSpeak panels are invited to register for the panel via the web or by telephone to participate in public opinion surveys.

Of the 1,833 completed interviews in the GenForward February survey, 93 percent were completed by web and 7 percent by telephone. The survey completion rate is 33.2 percent. The weighted household panel recruitment rate is 20.4 percent and the weighted household panel retention rate is 94.4 percent, for a cumulative AAPOR Response Rate 3 of 6.4 percent. The overall margin of sampling error is +/- 4.0 percentage points at the 95 percent confidence level, including the design effect. Among subgroups, the margin of sampling error at the 95 percent confidence level is +/- 6.4 percentage points for African Americans, +/- 7.6 percentage points for Asian Americans, +/- 6.3 percentage points for Latino/as, and +/- 5.9 percentage points for whites.

To encourage cooperation, respondents were offered incentives for completing the survey that ranged from the cash-equivalent of \$3 to the cash-equivalent of \$10.

The interviews from the two probability-based sample sources were combined for statistical weighting and analysis. The combined panel samples provide sample coverage of approximately 97% of the U.S. household population. Those excluded from the sample include people with P.O. Box only addresses, some addresses not listed in the USPS Delivery Sequence File, and some newly constructed dwellings. The statistical weights incorporate the appropriate probability of selection for the BYP and AmeriSpeak samples, nonresponse adjustments, and also, raking ratio adjustments to population benchmarks for 18-30 year old adults. A poststratification process is used to adjust for any survey nonresponse as well as any non-coverage or under- and over-sampling resulting from the study-specific sample design. The poststratification process was done separately for each racial/ethnic group and involved the following variables: age, gender, education, and census region. The weighted data, which reflect the U.S. population of adults ages 18-30, and the 18-30 year-old populations for African Americans, Latino/as, Asian Americans, and non-Latino/a whites, were used for all analyses.
