

GenForward March 2019 Toplines

The first of its kind bi-monthly survey of racially and ethnically diverse young adults

GenForward is a survey associated with the University of Chicago

Interviews:
02/08 - 02/25/2019
Total N: 2,134 adults
Age Range: 18-34

NOTE: All results indicate percentages unless otherwise labeled.

MARGIN OF ERROR ESTIMATES (% pts)

<i>Group</i>	<i>Estimate</i>
Full Sample	+/- 3.5
African Americans	+/- 5.33
Asian Americans	+/- 8.07
Latinxs	+/- 5.94
Whites	+/- 5.71

NOTE: All estimates are calculated at the 95% level of confidence

Q0. Did you vote for Hillary Clinton, Donald Trump, someone else, or not vote in the 2016 presidential election?

	African Americans	Asian Americans	Latinxs	Whites	All adults
Hillary Clinton	63	52	41	27	38
Donald Trump	5	8	12	32	22
Someone else	10	7	13	13	12
Did not vote in the 2016 presidential election	21	33	34	27	28
DON'T KNOW	-	-	-	-	-
SKIP/REFUSED	*	1	*	1	*
<i>N=</i>	547	251	515	763	2134

Q1. Overall, do you approve, disapprove, or neither approve nor disapprove of the way Donald Trump is handling his job as president?

	African Americans	Asian Americans	Latinxs	Whites	All adults
Strongly approve	5	4	5	13	9
Somewhat approve	7	10	9	20	15
Neither approve nor disapprove	16	9	16	14	14
Somewhat disapprove	12	20	20	17	17
Strongly disapprove	59	56	49	36	44
DON'T KNOW	*	-	-	-	*
SKIP/REFUSED	1	1	*	1	1
<i>N=</i>	547	251	515	763	2134

Q2. Overall, do you approve, disapprove, or neither approve nor disapprove of the way Nancy Pelosi is handling her job as Speaker of the House?

	African Americans	Asian Americans	Latinxs	Whites	All adults
Strongly approve	13	10	10	10	10

STUDY METHODOLOGY

The GenForward March survey is a project of Professor Cathy J. Cohen at the University of Chicago. Interviews were conducted with a representative sample from GenForwardSM, a nationally representative survey panel of adults ages 18-34 recruited and administered by NORC at the University of Chicago and funded by grants to the Black Youth Project at the University of Chicago from the John D. and Catherine T. MacArthur Foundation and the Ford Foundation.

A total of 2,134 interviews were conducted between February 8 and February 25, 2019 with adults ages 18-34 representing the 50 states and the District of Columbia, including completed interviews with 547 African American young adults, 251 Asian American young adults, 515 Latinx young adults, 763 white young adults, and 58 young adults with other racial and ethnic backgrounds. The survey was offered in English and Spanish and via telephone and web modes.

The GenForward survey was built from two sample sources:

- Seventy-two percent of the completed interviews are sourced from NORC's AmeriSpeak[®] Panel. AmeriSpeak is a probability based panel that also uses address-based sample but sourced from the NORC National Frame with enhanced sample coverage. During the initial recruitment phase of the

AmeriSpeak panel, randomly selected U.S. households were sampled with a known, non-zero probability of selection and then contacted by U.S. mail, email, telephone, and field interviewers (face-to-face).

- Twenty-eight percent of the completed interviews are sourced from the Black Youth Project (BYP) panel of young adults recruited by NORC. The BYP sample is from a probability-based household panel that uses an address-based sample from a registered voter database of the entire U.S. Households were selected using stratified random sampling to support over-sampling of households with African Americans, Latinxs, and Asian Americans ages 18-34. NORC contacted sampled households by U.S. mail and by telephone, inviting them to register and participate in public opinion surveys twice a month.

Panelists on both the BYP and AmeriSpeak panels are invited to register for the panel via the web or by telephone to participate in public opinion surveys.

Of the 2,134 completed interviews in the GenForward March survey, 97 percent were completed by web and 3 percent by telephone. The survey completion rate is 20.5 percent. The weighted AAPOR RR3 panel recruitment rate is 21.3 percent and the weighted household panel retention rate is 88.9 percent, for a cumulative AAPOR Response Rate 3 of 3.9 percent. The overall margin of sampling error is +/- 3.5 percentage points at the 95 percent confidence level, including the design effect. Among subgroups, the margin of sampling error at the 95 percent confidence level is +/- 5.33 percentage points for African Americans, +/- 8.07 percentage points for Asian Americans, +/- 5.94 percentage points for Latinxs, and +/- 5.71 percentage points for whites.

To encourage cooperation, respondents were offered incentives for completing the survey that ranged from the cash-equivalent of \$3 to the cash-equivalent of \$10.

The interviews from the two probability-based sample sources were combined for statistical weighting and analysis. The combined panel samples provide sample coverage of approximately 97% of the U.S. household population. Those excluded from the sample include people with P.O. Box only addresses, some addresses not listed in the USPS Delivery Sequence File, and some newly constructed dwellings. The statistical weights incorporate the appropriate probability of selection for the BYP and AmeriSpeak samples, nonresponse adjustments, and also, raking ratio adjustments to population benchmarks for 18-34-year-old adults. A poststratification process is used to adjust for any survey nonresponse as well as any non-coverage or under- and over-sampling resulting from the study-specific sample design. The poststratification process was done separately for each racial/ethnic group and involved the following variables: age, gender, education, and census region. The weighted data, which reflect the U.S. population of adults ages 18-34, and the 18-34-year-old populations for African Americans, Latinxs, Asian Americans, and non-Latinx whites, were used for all analyses.
